retractor and tonsil dissector***

eves tonsil snare

A long, thin, polished metal instrument, likely a tonsil snare, lying vertically on a dark wooden surface. The instrument features a long, straight shaft with a small loop at the top and a larger, more complex loop at the bottom. The loops are made of polished metal and have a smooth, rounded appearance. The shaft is also polished and has a small, textured section near the bottom loop. The background is a dark, textured wooden surface.

laryngoscope

A metal dental instrument, specifically a Freer's double ended elevator, is shown lying vertically on a dark brown wooden surface. The instrument has a long, straight handle with a hexagonal cross-section. At the top, there is a curved, hook-like tip. At the bottom, there is a sharp, pointed tip. The text "freer's double ended elevator" is written in yellow, italicized font, rotated 45 degrees, and positioned to the right of the handle.
