

PROBLEM HABITATION

PROBLEM HABITATION

- 1. Not covered habitation (No Safe Source habitation)
 - Source of drinking water is NOT available within 1.6 km in plain areas & 100 m in hilly areas-
 - Availability of safe water is NOT enough to meet drinking & cooking needs
 - Water source is affected with problems like excess of salinity, iron, fluoride, arsenic etc.
- 2. Partially covered habitation
 - - Source of drinking water is available

within 1.6 km in plain & 100 m in hilly areas

- - Capacity is 10-40 litres /capita/day
- 3. Fully covered habitation
- Include all the remaining habitat (except above two) • Problem Village- No water source within 1.6 km from community
- Water is present at depth of > 15 m
- Excess of Na^+ , K^+ , F^- salts, iron, heavy metals, • Water exposed to risk of
